

Checkpoint 2 – Midterm (Weeks 5–8)

Focus: Statistical Analysis, Performance Metrics, Initial Visualization

1. Statistical Analysis

- **Descriptive Statistics:**
 - Mean, median, and standard deviation of sales per product.
 - Identify outliers (products with unusually high or low sales).
- **Correlation Analysis:**
 - Explore relationship between sales and profit.
 - Example: Do high-selling products also yield high profit margins?

2. Performance Metrics

- **Top Products:** Rank top 10 products by revenue.
- **Top Categories:** Show percentage contribution of each category to total sales.
- **Profitability:** Compare categories not just by sales, but by profit margin.

3. Initial Visualization

- **Bar Chart:** Top 10 products ranked by sales.
- **Pie Chart:** Category revenue share.
- **KPI Cards:** Quick stats like “Top Product = Laptop, Revenue = ₱500,000.”

4. Example Insights

- *“Technology contributes 45% of total revenue, with Laptops being the single highest-selling product.”*
- *“Office Supplies have high sales volume but low profit margins, suggesting a need for pricing review.”*
